EC4307 Web Application Development Mini Project Evaluation Rubrics

The application must perform full CRUD (Create, Read, Update, Delete) operations on at least one main entity (for example, products, students or bookings) with data stored persistently in a database. A project without working CRUD should not score above 16 overall, regardless of how polished the interface is.

All submissions are also subject to the Academic Integrity checks (under code similarity and AI generated content).

Mark Allocation (out of 30)

Criterion	What is assessed?	Marks (out of 30)
Create	Adding new records through forms	4
Read	Listing, viewing details, search, filter and sort	4
Update	Editing existing records	4
Delete	Removing records safely	4
Validation and Error Handling	Client and server side validation, error messages, stability	2
Database Design	Structure, keys, relationships, data types	4
UI/UX & Responsiveness	Layout, navigation, consistency, mobile support	2
Code Quality and Structure	Organization, naming, reuse, version control	2
Documentation	README, setup steps, ERD, screenshots of user interfaces	2
Demonstration	Project demonstration and presentation skills	2

Dear students,

Please ensure that you submit the following items for your mini project:

1. GitHub Link: Submit your GitHub repository link through the Google Sheet.

https://docs.google.com/spreadsheets/d/14gsXFsGm_U7F8SSyEM0TBjrtggNf1SNyaufBdjPl4YU/edit?usp=sharing

2. Mini Project Report (Documentation): Maximum of 10 pages.
3. Demonstration Video: Maximum duration of 5 minutes. Please ensure that your camera is turned on while recording the video.

Submission Deadline: on or before 31st October 2026
Rename files using your index number.

Please Note: Penalties will be applied to submissions that exceed the specified limits for the demonstration video (5 minutes) and the mini-project report (10 pages). Therefore, please ensure that your video and report comply with the given requirements.

Thank you.
